This memorandum authorizes the extension of the comment period on the registration review Draft Risk Assessments for the peroxy compounds, peroxyoctanoic acid, and sodium percarbonate currently posted to the public docket at <https://www.regulations.gov>.

On May 4, 2020, the aforementioned registration review documents and supporting files were posted on the public dockets for public review and comment as part of the registration review process required under the Federal Insecticide, Fungicide, and Rodenticide Act. The deadline for submitting comments on these documents was 60 days from the date of posting, resulting in the anticipated conclusion of the public comment period on July 4, 2020. On May 28th, the Peroxy Compounds Task Force (PCTF) requested a 60-day comment period extension outlining that due to increasing demand from COVID-19, the PCTF member companies have diverted their time to address emergency COVID-19 related issues. As a result, they lack sufficient time to submit comments on the Draft Risk Assessment. The Agency agrees with the PCTF's rationale and is granting an extension of 60 days after the close of the original comment period. Specific cases and their docket numbers are listed below:

Registration Review Case Name and Number	Document Type	Docket ID Number	Chemical Review Manager and Contact Information
