

Public Notice: Request For Comments

EPA proposes to issue a draft Air Quality Permit to Construct for Cintas Corporation – Green Bay, WI on the Oneida Nation of Wisconsin

The purpose of this notice is to invite you to submit written comments on this proposed permit through the processes described in this notice.

When are written comments due?

The comment period closes on August 31, 2020.

What is being proposed?

The EPA proposes to issue a new federal Clean Air Act permit to modify in accordance with 40 Code of Federal Regulations, Part 49, for:

Cintas Corporation – Green Bay
Oneida Nation of Wisconsin
Brown County, Wisconsin

The facility is an industrial laundering facility that emits regulated air pollutants. This permitting action establishes federally enforceable limits on the facility's potential to emit air pollutants through operational restrictions on the pounds of soiled shop towels the facility may process during any 12 consecutive-month period. The federally enforceable limits in this permit reduce the facility's potential to emit below the major source threshold, and the facility will be considered a synthetic minor source pursuant to 40 C.F.R. § 49.158.

Because the facility is located within the exterior boundaries of the Oneida Nation of Wisconsin and because the Oneida Tribe does not have an EPA-approved permitting program, it is the

EPA's responsibility to issue the Construction Permit.

What is the current air quality in the area?

EPA has developed standards for specific air pollutants. These standards are called the National Ambient Air Quality Standards (NAAQS). There are NAAQS for sulfur dioxide (SO₂), nitrogen dioxide (NO₂), carbon monoxide (CO), particulate matter less than or equal to 10 microns (PM₁₀), particulate matter less than or equal to 2.5 microns (PM_{2.5}), ozone, and lead. The NAAQS set the maximum concentration of each pollutant in the ambient (outdoor) air that protects the health of the most sensitive individuals. This includes those with heart, respiratory, neurological and asthma problems.

The area is currently in attainment for all criteria pollutants.

Will the facility meet air quality standards?

This project is not expected to have a measurable impact on the ambient air quality within the region or cause or contribute to a Prevention of Significant Deterioration (PSD) increment violation. The stack heights are considered reasonable for dispersion of any air toxics and to protect human health and the environment.

How can I review documents?

You can review the draft Construction Permit, the Statement of Basis, the application and other supporting materials, including all data submitted by the applicant, at the following locations:

U.S. EPA, Region 5
77 W Jackson Boulevard
Chicago, IL 60604 (AR-18J)
Phone: (312) 886-7259
Hours: 8:15am-4:45pm
excluding federal holidays

Due to COVID-19, there is restricted building access for visitors. Therefore, we strongly recommend viewing the materials at the web addresses below or contact YeChan Lim at lim.yechan@epa.gov to obtain paper copies.

Electronic copies may be accessed and viewed at:

For TTY users: please call the Federal Relay Service at 1-800-877-8339.

How can I make comments?

The EPA will accept written comments by e-mail to [\[R5AirPermits@epa.gov\]](mailto:R5AirPermits@epa.gov) (include [Cintas Corporation – Green Bay Part 49 Comments] in the subject line); through <https://www.regulations.gov>

(Docket ID [#EPA-R05-OAR-2020-0393]); and by mail to the address below:

Genevieve Damico, Section Chief
U.S. EPA, Region 5
Air Permits Section, (AR-18J)
77 W Jackson Boulevard
Chicago IL, 60604

How do I get additional information?

YeChan Lim
Environmental Engineer
U.S. EPA, Region 5
Air Permits Section (AR-18J)
77 W Jackson Boulevard
Chicago, IL 60604
312-886-7259
lim.yechan@epa.gov

Will there be a public hearing?

No public hearing has been scheduled; however, you may request a public hearing. A request for a hearing must be submitted within thirty (30) days of this notice and must include the nature of the issues to be raised at the hearing. EPA will base its decision on whether a hearing will be held upon the showing of a significant degree of public interest.

What happens next?

The EPA will review and consider all comments received during the comment period. Following this review, the EPA may issue the permit, issue the permit with revisions or deny the permit.
