Proposed Air Quality Permit to Construct KGH Operating Company Bonanza State 20-15H

Notice issued: July 16, 2020

Written comments due:

5:00 p.m., August 17, 2020

Where is the facility located?

KGH Operating Company

Bonanza State 20-15H:

Uintah and Ouray Indian Reservation

Uintah County, Utah

SW/SE Sec. 20, T9S, R25E

Latitude 40.01737

Longitude -109.1232

What is being proposed?

This permit action will apply to an existing facility operating on the Uintah and Ouray Indian Reservation in Utah.

The Bonanza State 20-15H facility is a natural gas production source that compresses and treats natural gas and stores condensate from the field. The facility currently operates two natural gas-fired 4-stroke rich-burn (4SRB) reciprocating internal combustion engines to compress natural gas gathered from the field. The facility also operates one 2-phase separator and one 3-phase heater treater separator. In addition, the facility has three atmospheric pressure produced water storage tanks and three atmospheric pressure crude oil storage tanks.

This permit authorizes the construction and operation of new emission sources, specifically a 1.0 million standard cubic foot per day triethylene glycol (TEG) dehydration unit. The TEG dehydration unit would be constructed inside an existing building within the existing footprint of the facility. The permit also authorizes the removal of one of the permitted compressor engines currently operating at 20-15H and the removal of an unpermitted jet pump engine. This permit also maintains previously established enforceable emissions restrictions for existing installed and operating emissions units and associated voluntarily installed and operated control devices.

What are the effects on air quality?

The impacts to local air quality from the proposed project are not expected to be significant and should not have an adverse impact on attainment of the NAAQS. We have determined that an AQIA modeling analysis is not required for this permit action

Permit number:

SMNSR-UO-007088-2020.003

How can I review documents?

Due to the COVID-19 pandemic, you may view an electronic copy of the proposed permit and related documents online at the address below. More information can be had by speaking with the following contacts:

Ute Indian Tribe Energy and Minerals
Department Office

Contact: Mike Natchees, Air Quality
Program Director, at (435) 725-4974 or
