

it finds compelling reasons to deny the request.²

On March 27, 2020, the petitioner submitted a timely request that Commerce postpone the preliminary CVD determination.³ The petitioner requests postponement because, {t}he current deadline does not provide adequate time for Commerce to select mandatory respondents, issue questionnaires, receive responses, and then follow up with deficiency questionnaires.”⁴ In accordance with 19 CFR 351.205(e), the petitioner has stated the reasons for requesting a postponement of the preliminary determination, and Commerce finds no compelling reason to deny the request. Therefore, in accordance with section 703(c)(1)(A) of the Act, Commerce is postponing the deadline for the preliminary determination to no later than 130 days after the date on which this investigation was initiated, *i.e.*, July 6, 2020.⁵ Pursuant to section 705(a)(1) of the Act and 19 CFR 351.210(b)(1), the deadline for the final determination of this investigation will continue to be 75 days after the date of the preliminary determination.

Notification to Interested Parties

This notice is issued and published pursuant to section 703(c)(2) of the Act and 19 CFR 351.205(f)(1).

Dated: April 1, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

National Oceanic and Atmospheric Administration

[RTID 0648-XR111]

Endangered and Threatened Species; Notice of Initiation of a 5-Year Review of Three Foreign Corals

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and

Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for information.

SUMMARY: NMFS announces the initiation of a 5-year review for three foreign corals (*Cantharellus noumeae*, *Siderastrea glynni*, and *Tubastraea floreana*). NMFS is required by the Endangered Species Act (ESA) to conduct 5-year reviews to ensure that the listing classifications of species are accurate. The 5-year review must be based on the best scientific and commercial data available at the time of the review. We request submission of any such information on these three coral species, particularly information on the status, threats, and recovery of the species that has become available since their listing, effective November 6, 2015 (80 FR 60560).

DATES: To allow us adequate time to conduct this review, we must receive your information no later than June 8, 2020.

ADDRESSES: You may submit information on this document, identified by NOAA-NMFS-2020-0040, by either of the following methods:

- **Electronic Submission:** Submit electronic information via the Federal e-Rulemaking Portal. Go to www.regulations.gov and enter NOAA-NMFS-2020-0040. Click on the “Comment Now!” icon and complete the required fields. Enter or attach your comments.

- **Mail:** Submit written comments to Adrienne Lohe, Endangered Species Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13626, Silver Spring, MD 20910.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the specified period, may not be considered. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (*e.g.*, name, address, etc.), confidential business information, or otherwise sensitive or protected information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous submissions (enter “N/A” in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT:

Adrienne Lohe at the above address, by phone at (301) 427-8403 or Adrienne.Lohe@noaa.gov.

SUPPLEMENTARY INFORMATION: This notice announces our review of the following foreign coral species listed as

endangered under the ESA:

Cantharellus noumeae, *Siderastrea glynni*, and *Tubastraea floreana*. Section 4(c)(2)(A) of the ESA requires that we conduct a review of listed species at least once every 5 years. This will be the first review of these species since they were listed in 2015. The regulations in 50 CFR 424.21 require that we publish a notice in the **Federal Register** announcing species currently under active review. On the basis of such reviews under section 4(c)(2)(B), we determine whether any species should be removed from the list (*i.e.*, delisted) or reclassified from endangered to threatened or from threatened to endangered (16 U.S.C. 1533(c)(2)(B)). As described by the regulations in 50 CFR 424.11(e), the Secretary shall delist a species if the Secretary finds that, after conducting a status review based on the best scientific and commercial data available: (1) The species is extinct; (2) the species does not meet the definition of an endangered species or a threatened species; and/or (3) the listed entity does not meet the statutory definition of a species. Any change in Federal classification would require a separate rulemaking process.

Background information on each of the three species is available on the NMFS website at: <https://www.fisheries.noaa.gov/corals>.

Public Solicitation of New Information

To ensure that the reviews are complete and based on the best available scientific and commercial information, we are soliciting new information from the public, governmental agencies, Tribes, the scientific community, industry, environmental entities, and any other interested parties concerning the status of *Cantharellus noumeae*, *Siderastrea glynni*, and *Tubastraea floreana*. Categories of requested information include: (1) Species biology including, but not limited to, population trends, distribution, abundance, demographics, and genetics; (2) habitat conditions including, but not limited to, amount, distribution, and important features for conservation; (3) status and trends of threats to the species and its habitats; (4) conservation measures that have been implemented that benefit the species, including monitoring data demonstrating effectiveness of such measures; and (5) other new information, data, or corrections including, but not limited to, taxonomic or nomenclatural changes and improved analytical methods for evaluating extinction risk.

If you wish to provide information for the reviews, you may submit your

⁴ *Id.*

⁵ In this case, 130 days after initiation falls on July 4, 2020, a Saturday. Where a deadline falls on a weekend or federal holiday, the appropriate deadline is the next business day. See *Notice of Clarification: Application of “Next Business Day” Rule for Administrative Determination Deadlines Pursuant to the Tariff Act of 1930, As Amended*, 70 FR 24533 (May 10, 2005).

information and materials electronically or via mail (see **ADDRESSES** section). We request that all information be accompanied by supporting documentation such as maps, bibliographic references, or reprints of pertinent publications. We also would appreciate the submitter's name, address, and any association, institution, or business that the person represents; however, anonymous submissions will also be accepted.

Authority: 16 U.S.C. 1531 *et seq.*

Dated: April 1, 2020.

Angela Somma,

Chief, Endangered Species Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

U.S. Stakeholder Meeting on Pacific Bluefin Tuna Fishery Management Framework; Meeting Announcement

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting; rescheduled meeting.

SUMMARY: NMFS is holding a meeting to discuss the future management of the U.S. West Coast Pacific bluefin tuna (PBF) fishery, including management objectives and a management framework. Given recent developments related to Coronavirus/COVID-19, we have decided to reschedule this meeting originally planned for April 23, 2020. We are taking this step out of an abundance of caution to consider the safety of our visitors. The new date for this meeting is May 19, 2020.

DATES: The meeting will be held May 19, 2020, from 9 a.m. to 4:30 p.m. PDT, or until business concludes.

ADDRESSES: The meeting will be held in Room 3400 at the Glenn M. Anderson Federal Building, 501 W. Ocean Blvd., Long Beach, California 90802. Please notify Eric Poncelet (meeting facilitator), at eponcelet@kearnswest.com or (415) 697-0566 by May 4, 2020, if you plan to attend. If interested members of the public cannot reasonably attend the meeting in person, NMFS may provide for a teleconference phone line or webinar for such members if a request is made to the meeting facilitator. NMFS

strongly encourages in-person participation in order to facilitate discussion, unless developments related to Coronavirus/COVID-19 restrict attendance in person at that time. See **SUPPLEMENTARY INFORMATION** for additional information on attendance, participation instructions, and meeting materials.

FOR FURTHER INFORMATION CONTACT:

Celia Barroso, West Coast Region, NMFS, at Celia.Barroso@noaa.gov, or at (562) 432-1850.

SUPPLEMENTARY INFORMATION: NMFS intended to hold a meeting to discuss the future management of the U.S. West Coast PBF fishery, including management objectives and a management framework, on April 23, 2020 (85 FR 11967; February 28, 2020). However, given recent developments related to Coronavirus/COVID-19, we have decided to reschedule this meeting originally planned for April 23, 2020. We are taking this step out of an abundance of caution to consider the safety of our participants. The new date for this meeting is May 19, 2020.

Stakeholders have expressed an interest in developing management objectives and a long-term management framework for PBF. In September 2018, the Pacific Fishery Management Council (PFMC) recommended that its Highly Migratory Species Management Team develop a long-term management strategy for PBF (see the PFMC's "September 2018 Decision Summary Document" at https://www.pcouncil.org/wp-content/uploads/2018/09/0918_Dcision_Summary_DocumentV2.pdf). On May 2, 2019, NMFS held a stakeholder meeting in which participants discussed potential management objectives and strategies to achieve those objectives for the domestic commercial PBF fishery (see the NMFS report to the June PFMC meeting at https://www.pcouncil.org/wp-content/uploads/2019/06/J2b_Sup_NMFS_Rpt3_JUN2019BB.pdf). The upcoming meeting that is rescheduled for May 19, 2020, is intended to follow up the discussion from the 2019 stakeholder meeting as well as provide an opportunity for early comments on how to implement a new Inter-American Tropical Tuna Commission (IATTC) resolution on PBF conservation and management for 2021-2022 that NMFS anticipates the IATTC will adopt at its annual meeting in August 2020. In order to facilitate discussion, NMFS strongly encourages in-person participation at the meeting location described in the **ADDRESSES** section, if possible and unless developments related to Coronavirus/COVID-19

restrict attendance in person at that time. NMFS will email attendance instructions, which may include instructions to attend by teleconference or webinar, and background materials to the meeting participants who notify the meeting facilitator as described in the **ADDRESSES** section.

PBF U.S. Stakeholder Meeting Topics

The PBF U.S. stakeholder meeting topics may include, but are not limited to, the following:

- (1) An overview of international management of PBF and current management of the U.S. PBF fishery; and,
- (2) Potential management options for 2021-2022 and in the long-term.

Special Accommodations

The meeting location is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Celia Barroso, at Celia.Barroso@noaa.gov or (562) 432-1850, by April 27, 2020.

Magnuson-Stevens Act Provisions; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for comments.

SUMMARY: The Assistant Regional Administrator for Sustainable Fisheries, Greater Atlantic Region, NMFS, has made a preliminary determination that an Exempted Fishing Permit application submitted by the Northeast Fisheries Science Center in support of the 2020 Study Fleet Program contains all of the required information and warrants further consideration. This Exempted Fishing Permit would exempt participating vessels from minimum fish sizes and possession limits for species of interest, for sampling purposes only.
